
Introduction to Computer Forensics and Security

1. Preparation:

- 1.1 Create a new case structure using EnCase V6.
- 1.2 Add the Discarded Diskette.E01 evidence file to the case.

Tasks:

- 1. You have been given a formatted disk which has been used for a digital camera. You have already imaged and added the evidence file to EnCase and noticed that EnCase did not recover the deleted images, what is the alternative approach you might take to recover the deleted images. Try your alternative solutions on Discarded Diskette.E01 disk image in order to recover the deleted images.

- 2. Recover the deleted images from the disk image (Discarded Diskette.E01).
