

MSc Computing/Information Systems

Information skills to help you
with your project

Liz Peet – e.peet@mmu.ac.uk

MMU Library Services

Learning Outcomes of this Session

By the end of this session you will be able to:

- Apply strategies which will help with your literature search
- Identify good quality sources of information to use in your assignments
- Evaluate the sources you are using
- Recognise the importance of referencing and referencing management software e.g. Endnote
- Know where to find help

Your Projects may be on....

Swarm Robotics

Fuzzy logic

Java

Artificial Intelligence

Programming

Computer Vision

Machine Learning

Wireless Networks

Smart Cities

Image Processing

Facial Recognition

3D rendering

Computing

Eye Tracking

Enterprise
Programming

Distributed
Programming

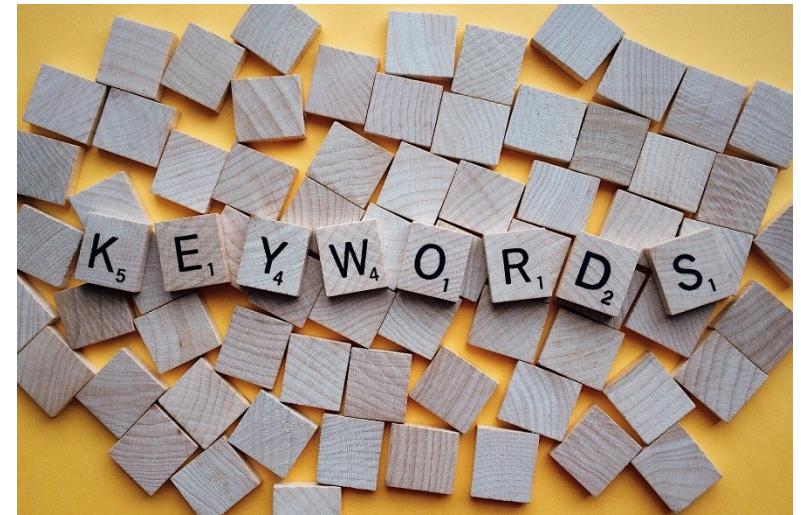

Recap on planning your literature search

- Spend time thinking about your project and your keywords
- Identify your resources

Think about your keywords

- Write out your topic as a question or a statement
- Pick out your concepts/keywords
- Alternative and similar words: synonyms, variant spellings,
- acronyms, abbreviations, plurals
- Organise what and where to search: Mind maps? Spider diagrams? Lists? Sections?

<https://pixabay.com/en/keywords-letters-scrabble-word-2041816/>

Search tips

CC0/ Public Domain: <https://pixabay.com/en/career-road-away-way-of-life-479578/>

Phrase searching

“management information systems” vs management information systems

Truncation

comput* will find compute, computer, computation etc

Wild cards ? or *

e.g. colo?r

Search tips

CCO/ Public Domain: <https://pixabay.com/en/career-road-away-way-of-life-479578/>

- ▶ AND – narrows results

“wireless comput*” AND appl*

- ▶ OR – expands results

“wireless computing” OR “cloud computing”

What is a literature review?

A literature review examines, evaluates and critiques the literature on a topic. In this context, 'literature' refers to academic sources of information such as books, book chapters, peer-reviewed journal articles, conference papers, theses and postgraduate dissertations. Some subject areas will also require you to examine reports for a literature review, such as government reports. You should check with your tutor what additional types of information sources you should consult.

A literature review is undertaken for different types of academic work and publications, for example:

- The introduction to, or a specific section of, a dissertation or thesis.
- The introduction to a research journal article.
- The entire content of a journal article, known as a review article.
- An individual assignment where the sole focus of the assignment is a review of the literature.

Literature reviews written for an individual assignment or as an introduction to a journal article tend to be more selective in the literature reviewed. Whereas literature reviews written as review articles or as part of a dissertation or thesis are more comprehensive in terms of reviewing the literature on that topic.

Literature reviews that are more comprehensive, require a structured approach to literature searching in order to provide a thorough overview of the research previously undertaken on the topic.

Don't forget to consult your assignment brief or unit handbook, or seek guidance from your tutor for the specific requirements of your literature review.

Why do a literature review?

Key information sources

ScienceDirect

Scopus

A screenshot of a library search interface. On the left, there's a purple button labeled 'Library Search'. Next to it is a search bar with the placeholder 'Search for books, articles and more'. To the right of the search bar are two icons: a gear for settings and a magnifying glass for search.

A-Z Databases: Computing

Find the best library databases for your research.

A screenshot of a database search results page titled 'A-Z Databases: Computing'. The page shows a search bar with '342 DATABASES' and a 'Search for Databases' button. Below the search bar are dropdown menus for 'Computing (16)', 'All Database Types', and 'All Vendors / Providers'. A navigation menu at the top includes letters from A to Z and a '#' symbol. The main content area displays a list of 16 databases under the heading '16 Databases found for Computing'. Each database entry includes the name, a small icon, and a 'Recommended' badge. To the right of the database list is a sidebar titled 'Computing help guides' with links to various resources like e-space, EndNote, and InfoSkills. At the bottom right is a 'Contact us' section showing a photo of people working at a computer.

Keeping up to date

The screenshot shows the Web of Science search interface. At the top, there's a navigation bar with links like 'Web of Science', 'InCites', 'Journal Citation Reports', 'Essential Science Indicators', 'EndNote', 'Publons', and 'Kopernio'. On the right, it shows 'Elizabeth', 'Help', and 'English'. Below the navigation is the 'Web of Science' logo and a 'Search' button.

The main search results area displays 'Results: 45 (from Web of Science Core Collection)'. A search query is shown: 'You searched for: TOPIC: ("facial recognition" OR "face detection") AND TOPIC: ("comput* vision") ...More'. There's a 'Create Alert' button next to it.

On the left, there are sections for 'Refine Results' and 'Publication Years'. Under 'Publication Years', it says '2018 (45)' and has a 'Refine' button.

A central modal window titled 'Save search / create search alert' is open. It has fields for 'Name' (with placeholder 'Search / alert name') and 'Description' (placeholder 'Enter a description'). A checked checkbox 'Email alerts' has 'e.peet@mmu.ac.uk' entered into its associated input field. Below these are dropdown menus for 'HTML', 'Author, Title, Source', and 'Daily alert'. A note below the dropdowns states 'Search query : TOPIC: ("facial recognition" OR "face detection") AND TOPIC: ("comput* vision") Refined by: PUBLICATION YEARS: (2018)'. A message at the bottom of the modal says 'The RSS feed will be available after creating the alert.' with an RSS icon. At the bottom of the modal are 'Cancel' and 'Save' buttons.

To the right of the modal, the search results are displayed. The first result is for 'Analyze Results' with 'Times Cited: 6 (from Web of Science Core Collection)'. The second result is for 'Times Cited: 4 (from Web of Science Core Collection)'. The third result is for 'Times Cited: 3 (from Web of Science Core Collection)'. The fourth result is for 'Times Cited: 2 (from Web of Science Core Collection)'. Each result has a 'Usage Count' link next to it. The results are dated 'APR 15 2018'.

- Current awareness services – saved searches and email alerts offered by Zetoc, Scopus & Web of Science among others

Evaluating your sources

Who?

Why?

When?

Who?

- ❖ Is it clear where the information came from?
- ❖ Is there an author?
- ❖ Who is the author?
- ❖ Do they have an agenda?
- ❖ Is he/she or the organisation easily recognisable?
- ❖ Can you find their contact details?
- ❖ Are there any hallmarks or known logos that help to authenticate the information?

Why?

- ❖ Why has the information been written and published?
- ❖ Why was it written in that particular style?
- ❖ Are there any hidden messages?
- ❖ Is there any bias (e.g. from organisations)?
- ❖ Is it emotive or impassive?
- ❖ What is it trying to get you to do?

When?

- ❖ When was it written?
- ❖ Is it still relevant?
- ❖ Has the information been kept up-to-date?
- ❖ Is it using up-to-date citations?
- ❖ Are there accurate publication details (e.g. date, publisher, place of publication)

Evaluating your sources

MMU Harvard

Manchester Metropolitan University has a standard version of the Harvard referencing style called MMU Harvard.

The MMU Harvard style requires you to reference each type of information source (eg book, article, webpage etc) in a standard way.

The 'MMU Harvard reference types A-Z' section below provides examples of how to cite and reference a wide range of information source types.

Please also consult the [Citations](#) section for instruction on how to present citations.

Our referencing [FAQs](#) provide further instruction on referencing and related issues.

If you are using a referencing management software other than [Endnote](#) to help with formatting your references, please ensure you check your references against the examples provided in the MMU Harvard guide.

You can also download the full MMU Harvard Referencing Guide as a PDF:

Avoid referencing nightmares

...Be systematic from the beginning!

Use

What is EndNote Online?

- Bibliographic reference management software package which works seamlessly with Word
- Web version (EndNote Online) available both on and off campus
- Full version available on-campus

Your EndNote Online Library

- A database of your bibliographic records
- Many types of materials are supported (journals, books, chapters, etc.)

How EndNote Online can Help You

1. Ways to build a library

- Direct Export
- Inputting records manually

2. Using your library with Word

- Cite While You Write
- Customising Individual Citations

Direct export

- Run a search in a database and then transfer records automatically into EndNote Online
- It's all done for you in the background!
- Works with Library Search; Web of Science; EbscoHost databases; Scopus; Sciencedirect; and many more

Internet of Things in Industries: A Survey

by [Li Da Xu](#); [Wu He](#); [Shancang Li](#)

IEEE Transactions on Industrial Informatics, 11/2014, Volume 10, Issue 4

Internet of Things (IoT) has provided a promising opportunity to build powerful industrial systems and applications by leveraging the growing ubiquity of radio-frequency identification (RFID...

From Wikipedia, the free encyclopedia

Internet Of Things

The Internet of Things refers to uniquely identifiable objects (things) being given an Internet protocol (IP) address and other features which enable them to be sensed, controlled, and integrated into computer networks without being directly programmable by people. The term Internet of Things was first used by Kevin Ashton in 1999. The concept of the Internet of Things became popular through the Auto-ID Center and related market analysis publications. Radio-frequency identification (RFID) is often seen as a key technology for the Internet of Things. If all objects and people in daily life were assigned radio tags, they could be identified and inventoried by computers. Identification of things may be achieved through other means such as 2D-codes as well.

Click on Preferences to change from Endnote to Endnote online

Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document. To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other. For example, you can add a matching cover page, header, and sidebar.

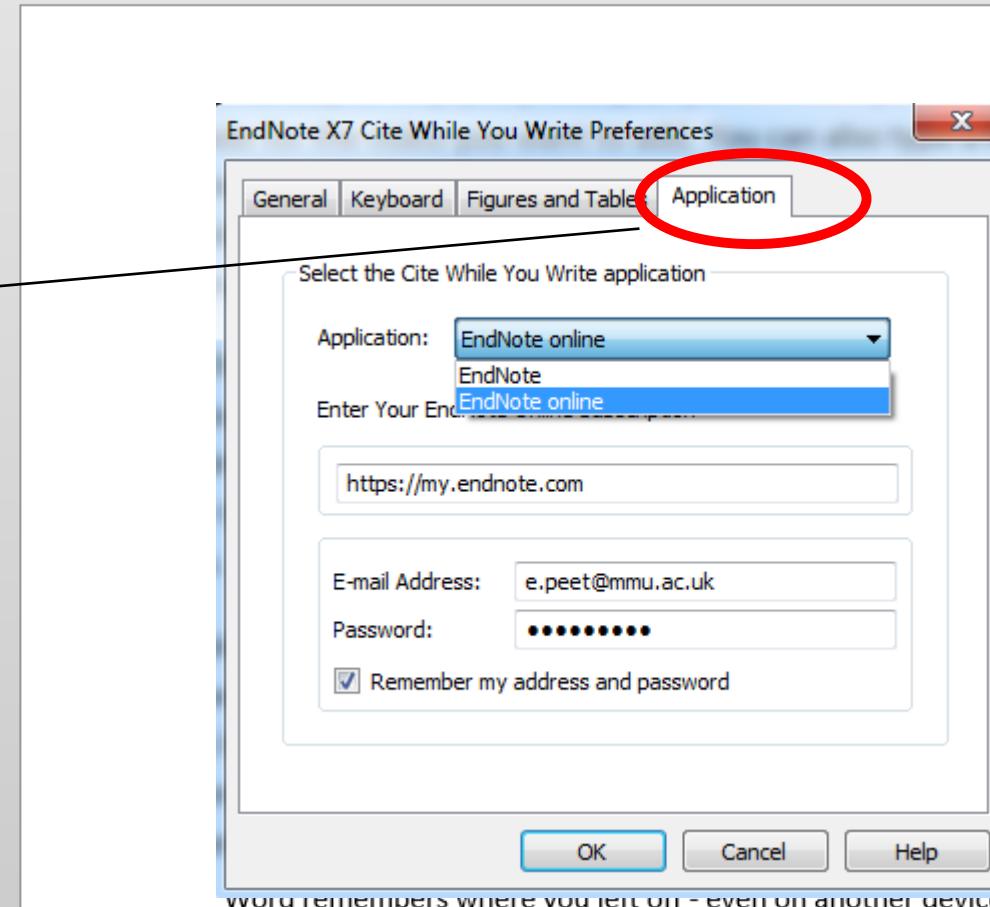

Click Insert and then choose the elements you want from the different galleries. Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply styles, your headings change to match the new theme. Save time in Word with new buttons that show up where you need them.

To change the way a picture fits in your document, click it and a button for layout options appears next to it. When you work on a table, click where you want to add a row or a column, and then click the plus sign. Reading is easier, too, in the new Reading view. You can collapse parts of the document and focus on the text you want. If you need to stop reading before you reach the end, Word remembers where you left off - even on another device.

Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document. To make your document look professionally

For example, you can add a matching cover page, header, and sidebar.

Click Insert and then choose the elements you want from the different galleries. Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply styles, your headings change to match the new theme. Save time in Word with new buttons that show up where you need them.

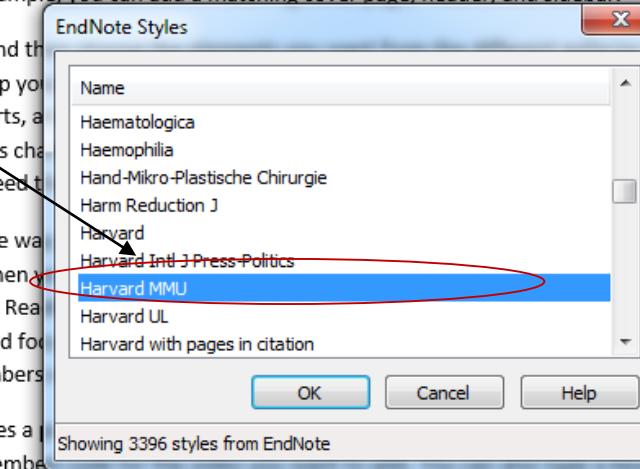

To change the way a picture fits in your document, click it and a button for layout options appears next to it. When you work on a table, click where you want to add a row or a column, and then click the plus sign. Reading is easier, too, in the new Reading view. You can collapse parts of the document and focus on the text you want. If you need to stop reading before you reach the end, Word remembers where you left off - even on another device.

Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document. To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other. For example, you can add a matching cover page, header, and sidebar.

Click Insert and then choose the elements you want from the different galleries. Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply styles, your headings change to match the new theme. Capture:

Capture Reference

To install the Capture tool, just drag the **Capture Reference** button to your Bookmarks bar (also known as "Favorites Bar" or "Bookmarks Toolbar"). In some browsers, you may need to right-click and select "Add to Favorites" or "Bookmark This Link." To use it, browse to a page you like and click the **Capture Reference** button in the Bookmarks bar. The Capture Reference window will open. Follow the instructions in the window.

About EndNote

What is it?

Software to help organise your references.

How can it help?

EndNote works seamlessly with Word to create in-text citations and a bibliography. You can choose from a range of referencing styles, including MMU Harvard.

Which version should I use?

- ▶ [Online EndNote](#)
- ▶ [Desktop EndNote](#)
- ▶ [EndNote iPad](#)
