```java
public class week1
{
    public static int [] wrongway ( int [] b)
    {int answer [] = new int[b.length];

        for(int i =0 ; i< b.length;i++)
            {
                answer[i] = b[b.length-1-i];
            }
        return answer;
    }
    public static void main(String args[])
    {
        // 1.2
        int a[] = {1,5,6,7,8,-12};
        int b[] = {1,2,3,4,5,6};

        for (int i =0 ; i< a.length;i++)
            {
                if(a[i] >= b[i])
                    {
        //          System.out.println(a[i]);
                    }
                else
                    {
        //          System.out.println(b[i]);
                    }
            }

        int reverse [] = wrongway (b);
        for(int i=0;i<reverse.length;i++)
            {
                System.out.println(reverse[i]);
            }

    }

}
```
