```java
public class Q5
{
    public static boolean relprime(int a, int b)
    {
        int i;
            for(i=2;i<b;i++)
                {
                    if((a % i ==0) && (b % i == 0))
                        {
                            return false;
                        }
                }
        return true;
    }

    public static void main(String a[])
    {   boolean rel = relprime(15,20);
        System.out.println(rel);
        rel = relprime(7,11);
        System.out.println(rel);
    }
}
```
